

Triennial Plan VI RFI Comment**Stephanie Bouchard**

Hello. I was just speaking to Ross Anthony at the Governor's Energy Office about the Inflation Reduction Act and its potential rebates for electric kitchen stoves. I'm particularly interested in induction stoves, and he suggested I comment on your triennial plan. As you probably already know, these stoves are energy efficient, but, more importantly, to my thinking, safer, since forgetting to turn off a burner (or having a child/pet turn on a burner) won't cause a fire or accidental burns.
