

Customer Data and Incentive Release

WHY A RELEASE IS NEEDED: In order to measure the success of its energy efficiency programs, Efficiency Maine needs to compare energy usage before and after efficiency improvements are made. To make this comparison, we need access to actual energy use information for participant homes. We take the privacy of customer information very seriously and will protect the confidentiality of your personal data. For participants in residential home energy savings programs, Efficiency Maine also requires participant authorization to release the incentive payment to the participating energy advisor.

Customer Energy Use Form

ENERGY USE FORM: Please provide information as is reasonably available on energy use/purchases during the prior 12 months. Collecting information on energy use before and after residential weatherization projects is critical to demonstrating the effectiveness of Efficiency Maine programs. Copies of your electric, fuel, and utility bills will help you complete this form. Most fuel providers and utilities keep detailed billing records they can provide to you, if you do not have records on hand.
