

THE PROCESS

1. Verify eligibility for enhanced low- and moderate-income rebates (if applicable)
2. Hire a Residential Registered Vendor
3. Complete the upgrade
4. Submit the Rebate Claim Form
5. Allow 6 weeks for rebate processing
6. File for federal tax credit if applicable

Heat Pump Incentives Up to \$10,600

TERMS AND CONDITIONS

Only one rebate will be paid for any given upgrade. Efficiency Maine does not warrant the performance of installed equipment. Program and incentives subject to change or termination. Please allow six weeks for rebate processing. Incomplete information may delay or disqualify your rebate.

"I live on the top of a mountain in Waterford, Maine, where it gets pretty windy. That's not a challenge for my heat pumps, which during the February cold snap kept me warm without backup even during -49°F wind chill! I'm also saving around \$300 a month using heat pumps instead of propane."

FRANK D., WATERFORD, ME

PAYBACK PERIOD (YEARS)	2.1	3.1	4.1

INCOME ELIGIBILITY

- Low-Income rebates - Household member participates in MaineCare, HEAP, SNAP, and/or TANF
- Moderate-Income rebates - Adjusted Gross Income (AGI) up to \$70,000 for individual tax filers or \$100,000 for joint filers

BUILDING ELIGIBILITY

- Primary, fossil-fuel, space-heating system, if any, connected only to a generator or turned off with power switch covered. For homes with domestic hot water heated by a central boiler, all room thermostats must be covered and either turned off or all the way down.
- Single-family house, two-unit duplex, or condominium, that is located in Maine. Mixed use (residential/business) buildings with commercial meter(s), residential buildings with 3 or more units, and all other buildings are covered under our Commercial and Industrial Program.
- Existing or new construction
- Heated throughout heating season
- For low- or moderate-income rebates, house must be homeowner's principal residence

INSTALLER ELIGIBILITY

- Efficiency Maine Residential Registered Vendor for heat pumps

HEAT PUMP ELIGIBILITY

- Only the costs of heat pumps with one indoor unit per outdoor unit ("single zone") are eligible for a rebate. Both ductless and ducted indoor units are eligible
- Heat pump indoor unit, outdoor unit (and air mover for ducted systems) combination is 25C federal tax credit-eligible (see "Air-Source Heat Pumps - North")
- New and previously installed heat pump(s) sized for at least 80% of home's peak heating load
- Heat pump plus supplemental heat sized for at least 100% of home's peak heating load
- Installed according to the Heat Pump Installation Requirements Checklist

See efficiencymaine.com for full list of eligibility requirements.
