Take advantage of rebates and loans today.

Efficiency Maine offers a number of rebates and loan products for home weatherization and energy efficiency improvements. Rebates are available for air sealing, insulation, and energy efficient heating systems.

Financed projects must include a minimum of one recommended energy saving measure. Check efficiencymaine.com for details, loan application, equipment criteria, and underwriting standards.

HEAT PUMP

HEATING SYSTEM

INSULATION

See full program details at efficiencymaine.com for eligibility requirements and lists of eligible models. Some restrictions apply.

Basic weatherization for as little as \$50 with rebates. Up to \$5,000 available in rebates per eligible home.

ENERGY UPGRADE BUNDLE \$50 customer copay

Reducing the amount of air that leaks in and out of your home is a cost-effective way to reduce heating costs as well as increase the comfort of your home. Rebate available for six hours of basic air sealing with an energy assessment, and basic insulation, including insulating box sills with spray foam; sealing or insulating a mobile home underbelly; repairing, insulating, and sealing doors or hatches; sealing or insulating heating system ductwork.
\$1,000 discount with \$50 customer copay.

INSULATION \$1,000 discount per zone (up to **\$3,000**)

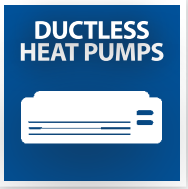

For optimal energy efficiency, your home should be insulated from the roof down to the foundation. When insulation is properly installed, heating systems run less frequently, helping to reduce ongoing energy expenses. Upgrade insulation in attic, basement, and/or walls.
Minimum project total cost of \$1,500. \$1,000 discount with \$500 customer copay per zone.

QUALIFIED HEATING SYSTEMS

PELLET AND WOOD STOVES \$300 rebate

High-efficiency wood and pellet stoves can be a renewable and cost-effective way to heat your home. Check our website for a list of eligible models and installation criteria including use of a make-up air kit.

DUCTLESS HEAT PUMPS up to **\$2,000** rebate

After completing the Energy Upgrade Bundle, homeowners are eligible for elevated incentives on heat pumps. Ductless heat pumps distribute heat and cooling directly to the spaces where they are installed. Rebates are available for highest efficiency rated (HSPF) models, also known to perform best in our cold climate. Check our updated eligible model list at efficiencymaine.com.
Customer contribution required. Rebate provides 80% of installation cost up to a cap of \$2,000.

HIGH EFFICIENCY CENTRAL HEATING SYSTEMS \$300 rebate

Rebates available for best-in-class boilers, furnaces, and heat pumps. Energy-efficient models are available for all heating fuels.

See full program details at efficiencymaine.com for eligibility requirements and lists of eligible models. Some restrictions apply.

Eligibility has been expanded to include participants in LIHEAP, municipal general-assistance programs, and other income-based programs. Owner-occupied mobile homes, and single family homes with a total municipal value of \$80,000 or less are also able to receive LIHESP discounts.
