

# Managed Charging for Electric Vehicles

## Upfront and Annual Incentives

**EV owners in Maine can participate in demand management to deliver benefits to the grid.**

Efficiency Maine offers residential electric vehicle owners an incentive to use our platform to help them reduce the power they draw from the electric grid when there is a forecast for peak demand. The platform will automatically delay vehicle charging until later in the evening when electricity is less expensive and less carbon-intensive to produce.

When enrolled to use the platform, a participant simply plugs their car in as they normally would, and Efficiency Maine will automatically delay their vehicle from charging on certain days with peak grid conditions. Participants are always able to override the delay in charging to accommodate their transportation needs.

Upfront Incentive <sup>1</sup>	\$50
Annual Incentive	\$50 (paid in December of each year of program enrollment)
Eligible Sectors	Residential
Enrollment Limit per Household	1 home EV charging unit or connected vehicle
Demand Response Events Per Year	Approximately 40 and no more than 60
Days Events Can Occur	Non-holiday weekdays from June 1 - September 30
Event Duration	8 hours from 1:00 p.m. - 9:00 p.m.

Electric vehicle owners also can receive **up to \$1,000 in federal tax credits** on the installation of a home charger, for qualifying homes <sup>2</sup>. To see which devices are eligible and learn how to receive your rebate, visit [efficiencymaine.com](https://www.efficiencymaine.com) <sup>3</sup>.

<sup>1</sup> Paid in the month of May following initial enrollment.

<sup>2</sup> Requirements or exceptions may apply. For more detailed information, please consult a tax advisor and/or official IRS publications: <https://www.irs.gov/forms-pubs/about-form-8911>.

<sup>3</sup> Terms and conditions apply. Visit [efficiencymaine.com](https://www.efficiencymaine.com) for full details.
