

**EFFICIENCY MAINE COMMERCIAL & INDUSTRIAL PRESCRIPTIVE INITIATIVE
Multifamily Initiative Weatherization Project Application**

PROJECT ELIGIBILITY FOR MULTIFAMILY BUILDING WEATHERIZATION

1. Limited to existing multifamily facilities with three or more units per building. A unit is defined as a residential living area that includes a bedroom, bathroom, kitchen and living room.
2. Entities that are not eligible include multifamily buildings with less than three units per building, single-family homes, condominiums, mixed-use buildings, home offices, rental homes and Airbnbs, new construction or building undergoing major renovations or changing use to multifamily.
3. Attic Insulation:
 - Attic must be air sealed prior to or as part of insulating the attic space. This includes any penetrations between the attic and the floor below.
 - Must be insulated to one of the following levels:
 - Open attic insulated to at least R49 with blown-in insulation.
 - Enclosed cavities filled to capacity with dense-pack insulation.
 - A minimum of 5" of closed-cell spray foam used to insulate all surfaces.
 - Closed-cell spray foam applied to within 1.5" of the surface of cavities that were subsequently enclosed.
 - Batt insulation not eligible for rebates.
 - All exhaust fans must be ducted outside of the building.
 - Code-approved fire protection must be added to foam insulation when applicable.
 - Incentive will be calculated at 50% of the project costs which includes materials and labor for insulation (eligible measures only) and air sealing activities (per installer's invoice to customer), up to \$5,000.
4. Basement Ceiling Insulation:
 - Intended for facilities that have existing or are installing new air source heat pumps that wish to exclude the basement from the thermal envelope.
 - Defined as basement, crawlspace, or other unconditioned space directly below a conditioned living area.
 - Basement must be air sealed prior to or as part of insulating the basement space. This includes all penetrations between the basement and the first floor.
 - Insulation upgrades eligible for incentives:
 - Basement or crawlspace ceiling with either dense-pack insulation or minimum 2" rigid or closed-cell spray foam, AND sill plate and rim joist areas with minimum 2" rigid or closed-cell spray foam.
 - The basement or crawlspace ceiling and sill plate/rim joist areas must all be insulated in order to be eligible for incentives.
 - Incentives do not include insulation of the below grade wall area.
 - Batt insulation not eligible for rebates.
 - Code-approved fire protection must be added to foam insulation when applicable.
 - Incentive will be calculated at 50% of the project costs which includes materials and labor for insulation (eligible measures only) and air sealing activities (per installer's invoice to customer), up to \$5,000.
5. Verification of project completion will require a copy of all material and installation invoices for the air sealing and insulation measures and one of the following:
 - Blower door testing to show CFM values both before and after project completion; OR
 - Provide pictures of before and after air sealing and pictures of before and after insulation installation.
6. Submit application along with all customer material and installation invoices to CIP@efficiencymaine.com within 14 days of first material purchase.
