

# SOLAR TRAINING FOR INSPECTORS

## Solar PV Workshop for Maine Code Officials

January 21, 2014

Kennebec Valley Community College, Fairfield, ME  
8:30am to 4pm

Learning objectives for the workshop include:

- Identify PV system types with a focus on 10KW or less, utility interactive.
- Identify the major topics from National Electrical Code 690 and other NEC articles related to PV.
- Identify building/fire codes and safety standards related to PV systems.
- Effectively inspect a PV system and identify common violations and issues

**Cost: \$50** Lunch and Refreshments included

Receiving credit:

- All participants will receive a KVCC certificate of completion of 6 contact hours.
- Contact hours can be applied to Residential or Commercial Energy Code requirements.
- Fire inspectors may apply to NFPA to receive CEUs.
- CEUs from International Association of Electrical Inspectors (IAEI) can be received at an additional charge. CEUs are authorized by IACET
